

DR. DENNIS B. GONZALES

Faculty | College of Engineering
University of the East

Dr. Dennis B. Gonzales, a graduate of Doctor in Information Techonlogy, is a distinguished information technology educator, researcher, and quality assurance expert with significant contributions to higher education, research development, and academic accreditation. He serves as a professor at several institutions, including the University of the East and the PUP Graduate School, reflecting his broad influence in undergraduate and graduate education.

With a career spanning more than two decades, Dr. Gonzales has held key academic positions such as Department Chair, Program Coordinator, and College Dean, demonstrating expertise in academic administration, curriculum development, and faculty leadership. His involvement as a PACUCOA Accreditor, CHED RQAT Assessor, and ETEEAP evaluator highlights his significant role in ensuring quality assurance and standards compliance across Philippine higher education institutions.

Dr. Gonzales is a prolific researcher and published author, with numerous works indexed in Scopus and international journals covering areas such as artificial intelligence, data analytics, intelligent systems, recommender systems, e-learning frameworks, and information systems development. His studies demonstrate strong applications of machine learning, predictive modeling, and data-driven decision systems for education, governance, and public service innovation.

In addition, he actively participates in international research conferences as a paper presenter, session chair, and panel member, earning recognition such as Best Research Paper awards for his contributions to emerging topics like generative AI systems and intelligent analytics.

Beyond research, Dr. Gonzales plays a vital role in the academic and professional community as a peer reviewer, research consultant, and resource speaker, delivering training on business analytics, AI tools, data analytics, research methodologies, and digital transformation. He has also contributed extensively to capacity-building initiatives and community outreach programs, particularly in digital literacy, ICT training, and alternative education support.

His excellence has been recognized through numerous awards, including distinctions as an Outstanding Educator, Model Teacher, and national award nominee, reflecting both his teaching effectiveness and leadership in the field. He is also professionally affiliated with organizations such as Huawei Academy, PACUCOA, CHED quality assurance bodies, and international IT and education associations, reinforcing his standing as a leader in IT education and research quality assurance.

Dr. Gonzales stands out as a multi-dimensional academic professional who integrates teaching excellence, research productivity, and institutional quality assurance leadership. His work continues to contribute to the advancement of AI-driven systems,

data-centric research, and academic standards, positioning him as an influential figure in information technology education and research development in the Philippines.
